

# Luster shield

## **A Brand New Product!**

### **Revives Luster ~ Restores Color**

The Ideal Antique Shop Companion in an Easy To Use Aerosol Spray

The perfect polish for kitchen cabinets, casual, and hard use  
woodwork and cabinetry.

Leaves a Fresh Smell, while it cleans & revitalizes.

Lustershield removes dust, fingerprints, smudges & stains,  
while leaving a true, long lasting, brilliant shine.

Lustershield combines old time paste wax luster &  
protection, with the ease of a modern aerosol.

The natural oil and wax combo preserves & protects all fine  
finishes by boosting resistance to heat & water spotting.

**Beautifies, Preserves & Protects**

**Lustershield** is a brand new "surface shine and spray wax" originally developed for industrial and commercial users. Available now to all who maintain woodwork, Lustershield combines ease of application with a hard wax finish to finally give the performance minded individual a furniture polish that is perfect for almost all finishes found in the home, shop or office.

Lustershield is a genuine, natural wax spray...ideal for the maintenance of cabinets, coffee & end tables as well as breakfast or dining tables.

**A spectacular, hard sheen is achieved when Lustersheen's Polishing Pal is used for final burnishing.**

**Lustershield** is a remarkable, all in one top coat finish for new wood, whether hard or soft, and works especially well on all hard, dense finishes. Finally, a great polish for all new finishes, like polyurethane and lacquer!

Lustershield's high quality waxes can actually be used as an alternative finish on all types of timber, stripped or finished interior woodwork, moldings, doors, etc..

**A superior polish because Lustershield leaves an actual wax barrier, and not a shiny oil film that evaporates in a day or two. The shine you see with Lustershield today will last and last. Lustershield does not evaporate away.**

## **Directions for use**

For best results, spray on a thin film and immediately wipe off excess with a soft buffing rag or lint free cloth.

Let dry then buff and burnish. Excellent results will be achieved using Lustersheen's Polishing Pal in either steel wool or bronze wool.

Apply a second or third coat if added luster is wanted. For touch ups or to polish chair rungs and table legs, or other small & hard to get to surfaces, spray Lustershield

directly onto cloth and then wipe the surface.

## **Other Lustersheen Products**
